

JOB VACANCY – Trainee Maintenance Engineer (Fire)

Folgate Safety are looking for a general builder / carpenter to join our team to undertake:

- Fire door installation / annual testing
- Fire boarding / studwork / plastering
- General building works
- Fire extinguisher refurbishment (training provided)
- Cable installations (assisting our electricians)

Experience working with hand / power tools is essential, and you must be reasonably competent at general carpentry / building works. We have an increasing demand for fire door repairs and installations which will make up around 40% of your working time.

You will have the opportunity to develop the role and earn a higher salary, you will also have the opportunity to service / test fire alarms and emergency lighting (with training) if you would like to. Working alongside our Electricians and Fire Engineers you will also install commercial fire alarm / emergency lighting systems and develop your knowledge of fire safety matters.

Based in Desborough, Northamptonshire we primarily work in the Midlands / North London areas, and a van / mobile phone will be provided (for work use only).

You will share an 'on call' rota with our fire engineers meaning you will be available to respond to call outs 24/7 for additional hourly pay.

Working the on call shift is one week in three.

On average we have one call out per month. You must live in Northamptonshire or a surrounding County, e.g. Leicestershire.

We are a fast growing company, established in 2010 who want to invest in training / developing our own staff.

Salary Negotiable (based on experience and competence) ranging from:

£18,000.00 - £22,000.00 per annum
(Overtime usually available)
+ Van and tools + Mobile phone

Please send a CV & covering letter to [**Charlotte@folgatesafety.co.uk**](mailto:Charlotte@folgatesafety.co.uk)
Closing date for CV's is Friday 20th November 2015
